

ROLES AND RESPONSIBILITIES

3061

(Sept 1999)

Surveying and mapping are required for effective administration and implementation of land and facility management, planning and budgeting for land acquisition and construction projects, and the design, construction, repair, and maintenance of CDF improvements.

Technical Services is responsible for topographic, land boundary, and construction surveying activities and provides technical supervision over department activities relating to surveying and mapping.

Master Site Plans, showing all existing improvements at a site, are to be developed and maintained for each of the department's facilities.

The Chief of Technical Services establishes policies, procedures, systems, and standards for surveying and mapping for the content and development of Master Site Plans.
