

ROLES AND RESPONSIBILITIES

3120

(Sept. 1999)

The department's Chief of Technical Services establishes engineering policies and standards for implementation of the aforementioned codes and regulations. The Region Chief may establish policies and procedures for materials and systems to be implemented, such as the use of fire sprinklers, types of roofing and siding and paving materials.

All proposed facility improvement, alteration and repair projects must be submitted by the Administrative Units to the region office for review and approval. The Region Technical Services staff will review the project requests for compliance with applicable codes, regulations, policies and standards. After review (including review by Sacramento Technical Services, if required), Region Technical Services staff will respond to the Administrative Unit with recommendations.
