

CDF'S ROLE IN CRMP

5231

(May 1988)

CDF's role in CRMP is (1) to provide specific technical expertise in the areas of forestry, fire protection, and resource management and (2) to act as a "lead agency" where appropriate. Representatives of the department will participate as part of interdisciplinary teams responsible for the development and implementation of such plans.

CRMP uses the best efforts of local people (public and private) to solve fire and resource problems and manage local resources. The department strongly supports coordinated planning efforts and will continue to provide staff support for specific plans as funding and personnel are available. Further instructions on implementation procedures of CRMP will be forthcoming.
