

RECOMMENDATIONS

5454

(No. 3 June 1991)

For each THP reviewed, the review team chairperson has the choice of one of four recommendations to the Director (or designee):

Recommendation One

That the THP be found in conformance with the rules of the Board of Forestry. This recommendation indicates that the proposed timber operations as outlined in the THP have incorporated the appropriate feasible alternatives and it is not anticipated that the operation will result in immediate, significant, and long-term harm to the natural resources of the state.

Recommendation Two

That the THP be found not in conformance with the rules of the board. This recommendation indicates that the proposed timber operation does not incorporate the appropriate measures or alternatives as provided in the FPRs to prevent immediate, significant, and long-term harm to the natural resources of the state; or that the plan meets the criteria set forth in board regulations under which a plan must be disapproved.

Recommendation Three

That the plan be found in conformance if the plan submitter adequately addresses the concerns and suggestions of the review team. The submitter's response to all concerns and suggestions will allow the Director or his/her designee to determine whether the board's regulations are being complied with, or whether the board's rules provide for the subject of concern [14 CCR § 898.1(f)]. The subject of expressing concerns and suggestions is discussed under Mitigation. The Recommendation Format (not available in e-format) provides a format for informing the submitter of this recommendation.

Recommendation Four

That a determination on the plan be delayed, as provided for in 14 CCR § 898.1(f), since the board's rules do not appear to provide for the situation of concern.

The definition of "immediate," "significant," and "long term" are included in 14 CCR § 901.

A copy of the review team's recommendations will be sent to those persons listed in 14 CCR § 1037.5(i) and to the Director's office.

The review team chairperson will not make a recommendation on a plan until after a PHI has been made, if one is to be made.
