

UNIVERSITY OF CALIFORNIA RESPONSIBILITIES

5623

(May 1988)

The Department of Land, Air, and Water Resources of the University of California at Davis analyzes soil samples and participates in maintenance of standards of soil survey work, soil classification, and soil correlation. The university employs scientific and technical personnel, charged to the project, for general assistance as needed.

The Department of Agronomy and Range Science of the University of California at Davis has responsibility for classification of vegetation, preparing vegetation sections for project reports, and for providing information on suitability of various soils for forest or range use. This department employs a qualified person to perform this work.
