

INTRODUCTION

The purpose of Fix-N-Fax is to disseminate helpful bits of information to those responsible for maintenance and repair of mobile equipment ([See Fix-N-Fax Index](#)). Sources for obsolete parts, shop equipment, and new products, plus short cuts and better methods of performing repair projects, as well as improved replacement parts information, are typical items to be found. Also included are modifications that are both permissive and mandatory. The authority for such items is granted to Fix-N-Fax by this section of the Mobile Equipment Management Handbook.

1. All issues are approved by the authority of the Deputy Director of Fire Protection and are policy.
2. Items that are permissive may be used at the discretion of the various equipment managers in each unit.
3. Items having the words “Mandatory Compliance” in the color pink written in the header portion of the document have been selected as equipment standards and require mandatory compliance.
4. The Unit and Region Fleet Manager will be prepared to advise and assist in the use of information contained in Fix-N-Fax.
5. No issue, where applicable, is to be considered as the authority to proceed with its recommendations without the approval of the Unit Fleet Manager or the Region Fleet Manager nor to circumvent the established repair limitations of the [Material Management Handbook](#) (2600 Exhibits).
6. Information from Mobile Equipment Notes may become a part of Fix-N-Fax if statewide application exists.
7. When there is a revision of a Fix-N-Fax issue, it will be issued under the same number.
