

## **PROTOTYPE CONSTRUCTION CDF**

**6745**

**(January 1988)**

A prototype model is built at the DEF and when field tested and finalized it becomes a Pilot Model. A Pilot Model, or sample, is furnished to the contract manufacturer for design and construction purposes.

A job description for the apparatus buildup is done on the pilot model concept and CDF purchases, in quantity, some of the larger components and supplies, and delivers them to the contractor for installation and assembly into a completed unit.
