

PREVENTIVE MAINTENANCE INSPECTION

6813

(No.150 August 2014)

The CAL FIRE Preventive Maintenance Program consists of scheduled inspections and planned services that are designed for an emergency response fleet whose use dictates much higher maintenance levels in order to maximize efficiency and minimize out-of-service time and unscheduled maintenance. Unscheduled maintenance is work resulting from breakdown and unexpected component failure. Our goal is to repair a system or replace a component before it fails during emergency operations. The CAL FIRE Preventive Maintenance Program dictates much higher maintenance levels and therefore much more stringent and frequent inspections than vehicles in regular private or commercial use. The CAL FIRE Preventive Maintenance Program is contained in the Mobile Equipment Management Pamphlet 6805 Vehicle Maintenance Procedure and Record.
