

FIX-N-FAX #94

CALIFORNIA DEPARTMENT OF FORESTRY AND FIRE PROTECTION

No. 94

Equipment Standard

Mandatory Compliance

Date: August 1971

All Dump Trucks and End Dump Trailers

New Motor Carrier Safety Regulations require a device to warn the driver when sufficient force is being applied to raise dump bodies. Also, identification plates, labels, or markings are required to clearly indicate the functions of load release actuator switches, levers, and valves located in the driver's compartment.

A kit containing a mechanical stop light switch which mounts inside the frame under the front of the dump bed and operates a warning light inside the cab is available at:

Mobil Hydraulic Equipment
724 Harbor Blvd.
West Sacramento CA 95691
Telephone: (916) 371-3692

Specify: Lift Warning Kit

Should you wish to make up your own kit, the switch must be mechanical. Hydraulic switches are not acceptable.
