

FIX-N-FAX #117

CALIFORNIA DEPARTMENT OF FORESTRY AND FIRE PROTECTION

Number 117

Revised: July 2000

Dozer Fresh Air System Replacement

This Fix-N-Fax is intended to inform personnel of the availability of a replacement fresh air system.

To avoid potential health issues, when the existing fresh air system requires repair or maintenance, do not fabricate parts. If 3M parts or systems are not available, a recommendation is to replace the total unit with a Reimers Engineering System.

An evaluation of the Reimers Proto-type has been completed and accepted by FREDAC. The Region Fleet Managers, can handle all questions and provide additional information.

Please note: these types of systems shall not be used for fire control operations.

Manufacturer: Reimers Engineering, Inc.
6314-K Gravel Avenue
Alexandria, VA 22310
(707) 922-0606
