

FIX-N-FAX #124

CALIFORNIA DEPARTMENT OF FORESTRY AND FIRE PROTECTION

Number 124

Equipment Standard

Mandatory Compliance

Revised: November 1996

Revised: May 1999

Lettering Pattern, Conservation Crew Vehicles

All mobile equipment shall be identified with decals and other appropriate markings chosen by the Department of Forestry and Fire Protection's Director, and approved by the Director of the Department of General Services. Equipment subject to emergency response and law enforcement activities (except undercover vehicles) shall be painted a specific color and identified with decals to ensure uniformity in appearance for quick and accurate public identification.

The marking package for Crew Carrying Vehicles described herein is effective upon issue of this Fix-N-Fax. It is the standard for all CCV's in the field.

It is understood that it is impossible to place every element of CDF marking packages in precisely the same location when dealing with the wide variety of make, model, and age of equipment.

The following pages of this Fix-N-Fax contain illustrations of the CCV marking package approved by all cooperating agencies including a table of the individual camps, three (3) letter designators.

CLARIFICATION (Radio Identifiers)

The Radio Identifiers for all operational CCVs is a combination of the camp three (3) Letter Designator and the appropriate crew number. For maximum crew vehicle flexibility, the three (3) letter designators shall be PERMANENTLY AFFIXED and the crew number installed with a RED magnetic backing, located per the illustrations.
