

LONG-TERM FIRE RETARDANT REQUIREMENTS

8410

(September 2003)

Retardants used in CDF's air attack program are approved for use according to requirements of specifications prepared by the USFS in cooperation with CDF and other using agencies. These specifications are intended to ensure that aerial retardants provide a desired level of effectiveness, and that they meet requirements for corrosion, spoilage, storage and other factors. CDF-approved fire retardants are qualified under one or more of the following USFS specifications: 5100-304a, b, and c
