

ANNUAL OPERATING PLANS

(No. 49 February 2005)

8522

Operating plans document the organization and interagency relationships that both the department and federal agencies will support to provide fire protection to lands covered under agreement. Once approved, these plans become a formal part of the cooperative agreement.

If disagreements over operating plans cannot be resolved at local levels, then they may be forwarded to the Director. Changes to operating plans from year to year can be noted and only those affected pages need be forwarded to Sacramento.
