

## **CALTRANS**

(No. 49 February 2005)

**8533**

CDF and CALTRANS will share resources as outlined in the CDF/CALTRANS interagency agreement. This agreement is intended to serve as a parent agreement at the departmental level. Each Caltrans District and CDF Unit is encouraged to develop area-specific attachments for function services unique to their respective areas of influence. Section 9240-3 requires a yearly meeting with the Caltrans district highway engineer by May 1 each year. Specific Caltrans and CDF responses to such all-risk incidents such as fires and snow removal should be addressed in these attachments. Information should include items such as ordering procedures, payment issues and roadside hazard reduction.
