

## **PLAN ELEMENTS**

**9013**

(No. 1, 1987)

The implementation of the red flag alert plan will include the following:

- Dissemination of appropriate information to the news media and direct personal contacts informing the public of the significance of the current situation, providing firesafe advice, and encouraging public cooperation with their fire agencies.
- Aircraft and/or ground patrols in predetermined areas, using engine companies, station personnel, and battalion chiefs in conjunction with Volunteers In Prevention. This facilitates early detection and reporting of fires, rapid suppression of fire starts, and identification of possible arson suspects.
